Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The abstract of the disclosure is objected to because it includes the phrase "means".
Correction is required. See MPEP § 608.01(b).

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

4. Claim 6 is objected to because of the following informalities: the tense of the term "carry" in line 3 is improper. Appropriate correction is required.

Allowable Subject Matter

5. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The following is a statement of reasons for the indication of allowable subject matter: Upon examination, the art considered as a whole, alone or in combination, neither anticipated nor renders obvious the claimed device comprising a first belt means that moves product to be rolled; a second belt means for moving product that do not require being rolled; an actuating means for actuating the first belt means in a first direction and for actuating the second belt means in a second direction; a rolling means having a concave housing shaped relative to the product moved by the first belt means, the rolling means interposed between the first belt means and the second belt means such that product being moved by the first belt means is rolled by the rolling means.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 line 1 recites the limitation “at least moving means” which is found to be indefinite. The use of the phrase “at least” implies reference to a quantity, which has not been disclosed by Applicant in the claim limitation. Please consider removing the phrase “at least” if no quantity is to be referenced.

Art Unit: 3721

Claim 1 lines 5-6 reference the operation of the first belt means via the actuating means, which is found to be a redundant limitation as lines 3-4 of claim 1 recite this limitation.

Claim 1 lines 8 and 15 recite the phrase "are intended to roll" which is found to be indefinite. As written, Examiner cannot determine whether rolling the product is a limitation of Applicants invention, since the limitation is presented as a probable function of the means.

Claim 2 line 2 recites the phrase "idle wheels gripping in the first and second direction" which is found to be indefinite. As written, Examiner is unable to determine what the idle wheels are gripping.

Claim 2 line 3 recite the phrase "respectively" which is found to be a redundant limitation as line 2 of claim 2 recites this limitation.

Claim 6 line 2 recites the limitation "intended to take each product" which is found to be indefinite. As written, Examiner cannot determine whether taking each product is a limitation of Applicants invention, since the limitation is presented as a probable function of the means.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations related to the claimed invention.
